BOND PROJECT

Future Community Park
in partnership with OSU-Cascades

The bond would fund:

Open-air recreation center / ice rink
Required road and utility work

For bond measure projects and cost, visit the “About BPRD” page at www.bendparksandrec.org

The bond seeks $29 million over 20 years at a cost of $.24 per $1000 assessed value.
For property valued at $200,000, the cost would be $4 more per month or $48 per year.
BUILDING A BRIGHTER FUTURE FOR EVERY STUDENT

HOME OF YOUR NEW ELEMENTARY SCHOOL

OPENING FALL 2015

DESIGNER - STEELE ASSOCIATES ARCHITECTS
GENERAL CONTRACTOR - KIRBY NAGELHOUT CONSTRUCTION COMPANY

THANK YOU VOTERS!
Vote YES for our Future!

Our children are our greatest gift
Our students only have one chance to thrive, together we can make it great.
Vote YES and every school will benefit!

PROJECTS AT EVERY SCHOOL
138 SAFETY, MAINTENANCE, TECHNOLOGY, AND ENERGY CONSERVATION PROJECTS
Vote YES and put my Dad to work!

SCHOOL CONSTRUCTION SUSTAINS THE ECONOMY
YOUR $96M INVESTMENT WILL SUPPORT THE LOCAL ECONOMY AND SUSTAIN HUNDREDS OF JOBS
SCHOOL CONSTRUCTION SUSTAINS THE ECONOMY

YOUR $96M INVESTMENT WILL GENERATE $155M TO THE ECONOMY & SUSTAIN HUNDREDS OF JOBS
SCHOOLS ARE OUR GREATEST COMMUNITY ASSET

LAST YEAR ALONE, COMMUNITY MEMBERS SPENT 110,000 HOURS HOSTING EVENTS
YES FOR NEW SCHOOLS!
MAINTAINS THE CURRENT TAX RATE - REALLY!

THANKS TO LONG RANGE PLANNING & SOUND FISCAL DECISIONS, THE TAX RATE WILL BE THE SAME
Why Should We Vote YES on 9-92?

It will not increase our taxes above what we currently pay. Since the current bond is expiring and interest rates are so low, now is the responsible time to act and save taxpayers money long-term.

Supporting 9-92 will mean jobs for local construction workers and area contractors struggling under the weight of our economy.

Over half our schools are over 30 years old. Measure 9-92 will allow our school district to build two new schools – one elementary and one middle school – while also performing 138 specific safety, maintenance, and repair projects at existing school.

Great Schools = Great Community

Vote YES on 92-9
Voting YES for schools will

1. Build new schools to balance surging enrollment
2. Fund 138 critical safety and maintenance projects
3. Sustain hundreds of jobs in our community

All without raising your current tax rate • Vote YES on 9-92

“Approval won’t increase homeowners’ tax bills, but it will meet a critical need for our children. Voters should say yes.”

TOTAL RECOMMENDATION
$96 million

How Much

This bond measure will not increase the current tax rate. This $96 million bond is projected to cost 38 cents per $1,000 of taxable value annually, over the life of the bond. Thanks to the retirement of existing bonds in 2013 and the potential refinancing of 2007 bonds, the overall tax rate is projected to remain at the current rate with the addition of the new bonds. This amount is equal to an estimated cost of $6 per month on a home with a taxable value of $200,000.

Job Creation

The dollars invested in our community as a result of this construction bond would sustain hundreds of jobs each year.

Bend-La Pine Schools plans to hire local contractors to do the construction work associated with the bond to the greatest extent allowed by law.

Economic Engine

Schools are not only the hub for learning in the Bend, La Pine and Sunriver communities, but also a place for community members to gather and host events.

During the 2011-12 school year alone, community groups spent nearly 110,000 hours hosting events at our schools, and on our fields when classes were not in session. The economic impact of the regional and national events that took place in our community alone, at our schools, is in the millions.

May 21, 2013 Election – Quick Facts
Bonds for New Schools, Safety Improvements, Classroom Renovations and Preservation

What

Bend-La Pine Schools’ 2010 and 2012 Sites and Facilities Committees, in partnership with the community, has developed a recommendation for a school capital construction bond request that proposes to address the following four major areas:

- **Provide Neighborhood Schools in High-Growth Areas:** Construct one elementary school and one middle school to meet current and anticipated future overcrowding caused by continuing enrollment growth.

- **Maintenance and Preservation at Existing Buildings:** Nearly half of the District’s schools are over 30-years-old, and projects are proposed to update these facilities. The bond funding would allow the District to replace leaking roofs and windows, and upgrade heating, ventilation, electrical, and plumbing systems. The bond will also allow the District to make energy saving improvements to many of its schools and facilities.

- **Safety Improvements:** Make health and life safety upgrades including fire sprinklers, security systems, electrical wiring, intercoms and entrance redesign to provide improved visibility of visitor access. Add security fencing at several school sites. Add playground safety improvements at several elementary schools and safety improvements at high school physical education spaces including gyms, courts, and fields.

- **Classroom Additions and Renovations:** Many of the District’s classrooms were constructed decades ago. The bond will allow the community to add and renovate classrooms and support spaces at existing elementary and middle schools, including modernization projects and increasing instructional spaces at high schools for Science, Technology, Engineering, Arts and Mathematics.

Why

Many District facilities are reaching capacity. Between 1997 and 2012, school district enrollment grew by nearly 4,400 students (36% in the last decade and a half). According to state and local projections, this trend is expected to continue. In fact, Portland State University’s Population Research Center projects that our District will grow by approximately 3,000 students in the next ten years. The bond measure proposes to fund expansion of several existing school sites and renovation and expansion of existing school buildings.

When

The committee recommended that the Bend-La Pine Schools Board of Directors place a bond measure on the May 21, 2013 general election ballot.
Bond Projects Map

Voters overwhelmingly supported a November 2006 $119 million bond request to build three new elementary schools and complete more than 170 much-needed projects at our Bend, La Pine, and Sunriver area schools and facilities between 2006-2011.

Thanks to community support, these projects have extended the life of existing buildings, many of which are more than 30 years old, provided funds for renovations and expansions of existing buildings, and built neighborhood schools in high growth areas.

Bend

Sunriver

La Pine
The 2012 Sites and Facilities Committee is recommending a bond levy that would finance 140 projects, including two new schools. This project would extend the life of existing buildings, many of which are more than 30 years old, provide funds for renovations and expansions of existing buildings, and build neighborhood schools in high growth areas.
THE BOND MEASURE WOULD PROVIDE:

MAINTENANCE AND PRESERVATION OF EXISTING BUILDINGS:

Nearly half of the District’s schools are over 50 years old, and projects are proposed to update these facilities. The bond funding would allow the District to replace leaking roofs and windows, and upgrade heating, ventilation, electrical, and plumbing systems. The bond would also allow the District to make energy saving improvements to many of its schools and facilities.

SAFETY IMPROVEMENTS:

Make health and life safety upgrades including fire sprinklers, security systems, electrical wiring, intercoms and entrance redesign to provide improved visibility of visitor access. Add security fencing at several school sites. Add playground safety improvements at several elementary schools and safety improvements at high school physical education spaces including gym, courts and fields.

CLASSROOM ADDITIONS AND RENOVATIONS:

Many Bend-La Pine Schools classrooms were constructed decades ago. The bond would allow the District to renovate old classrooms, add new classrooms, and improve instructional spaces for Science, Technology, Engineering, Arts and Mathematics.

NEIGHBORHOOD SCHOOLS:

We are growing! The bond would allow for the construction of one elementary and one middle school to meet current and anticipated future overcrowding caused by continuing enrollment growth.

WHY

Many District facilities are reaching capacity. Between 1997 and 2012, school district enrollment grew by nearly 4,400 students (56% in the last decade and a half). According to state and local projections, this trend is expected to continue. In fact, Portland State University’s Population Research Center projects that our District will grow by approximately 3,000 students in the next ten years. The bond measure proposes to fund expansion of several existing school sites and renovation and expansion of existing school buildings.

HOW MUCH

This bond measure is not expected to increase the current tax rate. Thanks to the retirement of existing bonds in 2013 and the recent refinancing of 2007 bonds, the overall tax rate is projected to remain at the current rate with the addition of the new bonds.

Bond payments will be structured so that new residents who move into the community would assist in the payment of the bond measure.

PROPOSED PROJECTS FOR BEND SENIOR HIGH SCHOOL

- Replace temporary classrooms with permanent classrooms
- Art classroom renovation
- Media center/library renovation
- Renovate building exterior
- Replace exterior single pane windows in A, B & C Halls
- Baseball field irrigation replacement
- Replace track surface
- Replace stadium poles and lights
- Construct multi-use physical education and athletics facility
- Renovate tennis courts
