What does it all mean?

• When presented with a set of possible future developments in the Oregon education system, Oregonians express high desirability for:
  o Improved student knowledge of money management and household finances.
  o Better understanding of the lessons of citizenship, work, and family.
  o Greater parental involvement.

• While residents are not confident that these improvements will come to pass, they do foresee that schools will become fundamentally different places in 10 years, involving new classroom atmospheres and teaching techniques.
