(excluding returned evaluations where the respondent skipped this question)

### In response to the evaluation question:

What would you like parents/the community to better understand about the district or the work of your board?

Many members listed that they wished their communities knew more about a school board's roles and responsibilities and how they differ from that of school administration or education staff. They also wanted their communities to know more about different process like finance and budgeting, how the community can best communicate with the district, how the community can best get involved with the school and students, various legal requirements of the board and the district, and district successes.

Board Development has several trainings and the following free webinar available to build and enhance community engagement programs:
